## AppAware

AppAware (available in Pro and Premium Editions) provides Customers of select Digital.ai Application Security Component Offerings with a Subscription to an integrated monitoring service that furnishes security and current threat information about their protected Customer Applications.

Product or Service	License Metric	Deployment
AppAware	Customer site or named account (Customer Instance)	On-Demand

### Product or Service Limits

Limit Metric Type	Limit Metric Quantity Per Edition Where Indicated	Impact
Customer site or named accounts (Customer Instance)	Essentials: 1	Additional Customer site or named accounts (Customer Instance) beyond the limit metric are prohibited without additional purchase.
	Pro: 5	
Requests per Second per Customer Instance	Essentials: 10	Customer Instances generating in excess of the limit metric will fail and not be processed by AppAware.
	Pro: 100	

### Additional Terms:

**Artificial Intelligence Features:** If the Product or Service includes features that utilize artificial intelligence (“AI Features”), Customer acknowledges that: (i) Digital.ai does not guarantee the accuracy, completeness, or reliability of any outputs generated by AI Features; (ii) Customer is solely responsible for any decisions made or actions taken based on outputs from AI Features; and (iii) Customer agrees not to use AI Features in any high-risk or critical environments where errors or inaccuracies could lead to significant harm or damage.

Customer’s access to AppAware requires the purchase of Digital.ai Application Security Component Offerings.

### Definitions:

“Customer Instance” means Customer’s AppAware application within Customer’s tenant within Digital.ai’s multi-tenant regional environment which may receive Requests from multiple Customer Applications.

“Component Offerings” include:

- [App Protection for Android Native](#)
- [App Protection for Linux ARM](#)
- [App Security for Android App](#)
- [App Security for HybridJS](#)
- [App Security for Mobile: ARM](#)
- [App Security for Web](#)
- [Application Protection for Mobile: Essential](#)
- [Application Security for Apple](#)
- [Application Security for Windows](#)
- [Java Bytecode Protection](#)

A “Request” is a report of one or more threat activity events sent to AppAware from a device where the protected Customer Application is installed and running.
