Application Protection for Desktop

Application Protection for Desktop provides Customer with a license key and associated on-premise Software that can be used to harden desktop-based Customer Applications with runtime self-protection, anti-tampering, and obfuscation code system protections.

Product or Service	License Metric	Deployment
Application Protection for Desktop	Per Application	On-Site

Product or Service Limits

Limit Metric Type	Limit Metric Quantity	Impact
Customer Application(s) / Target Application(s) Protected	1	Protections beyond the limit metric are prohibited without additional purchase.

Optional Purchases

Product	License Metric	Deployment
AppAware	Per Customer site or named account	On-Demand

Requirements: Use of Application Protection for Desktop requires that the Customer's Host Platform, Target Platform, and Customer Application (Target App) meet the specifications provided for in the support matrix in the applicable Documentation:

- Application Security for Windows
- Application Security for Mac
- Application Protection for Linux Intel
- Application Security for Apple

Additional Terms:

Artificial Intelligence Features: If the Product or Service includes features that utilize artificial intelligence ("AI Features"), Customer acknowledges that: (i) Digital.ai does not guarantee the accuracy, completeness, or reliability of any outputs generated by AI Features; (ii) Customer is solely responsible for any decisions made or actions taken based on outputs from AI Features; and (iii) Customer agrees not to use AI Features in any high-risk or critical environments where errors or inaccuracies could lead to significant harm or damage.

Definitions:

"Host Platform" means the operating system (e.g., Windows, MacOS, and Linux) and hardware architecture on which Customer installs Application Protection for Desktop.

"Target Platform" means the operating system (e.g., Windows, MacOS, and Linux) and hardware architecture on which the Customer Application is intended to run.
